

Graniterock®

CORPORATE GRAPHIC STANDARD GUIDELINES

INTERNAL

Updated July 2025

The Graniterock logo and graphics are an important part of our Company's identity. Together with Graniterock People, Products and Projects, they communicate who we are. They set us apart from the competition and contribute to our visibility in the marketplace.

To ensure a consistent corporate image, we developed Graphics Standard Guidelines to serve as your reference for creating and maintaining the Graniterock identity. These guidelines define all the elements that make up our visual image. They include standards for everything: colors and sizes for the Graniterock logo, colors and sizes for stationery, type sizes and styles for advertising, collateral and signage.

Please take time to read these guidelines. By following them, you do more than build Graniterock's corporate identity. You build business.

Questions can be answered by CCS team. [Media assets](#) are available online.

Thank you.

The Graniterock Logo

Every expression of our corporate identity is based on the logo. It is the major visual identity of Graniterock. The Graniterock logo is composed of letters and includes an angled square with an inset cube.

Clarity for the Graniterock identity is utmost in consideration. To protect the logo's integrity, these options must never be altered.

Graniterock Full Color Logos
These are the preferred logos and should be used in most all applications.

Graniterock Greyscale Logos
These logos can be used when the full-color logos are not an option.

Graniterock Mono Logos
Use these logos sparingly.

Clear Space

To effectively identify Graniterock materials, the logo needs good visibility. This includes giving an appropriate amount of clear space on all sides of the logo.

Use the height and width of the Graniterock “G” as guidelines for the minimum amount of clear space. Please note that this is the minimum size for spacing, it is not a fixed value.

Legibility

Use the available logo variations to best suite your needs. The background color will often dictate which Graniterock logo to use, clarity should be the objective. The logo stands out best against bright white, which is the preferred background.

Alternate Logos and Trademarks

Over the years, Graniterock has developed many alternate logos and trademarks to support our evolving businesses. Please use these logos when applicable.

Graniterock Construction Division

Use the Construction Division logo with the License #22 lockup whenever referencing a general construction project.

Graniterock Supply

Use the Graniterock Supply logo whenever referencing what was formally known as a “building materials” branch.

Graniterock Pavement Recycling Group (PRG)

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Graniterock Logistics

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Granitepatch

The Granitepatch logo should be used only when referencing the Granitepatch patching kit. This logo is available in green and white only.

Safety Before all Else

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Always maintain the federally regulated trademark symbol when using logos.

SAFETY Before all Else

Community Events

Graniterock Team Members find ways to give to the communities in which they live and work. Each of these annual community events has it's own developed look and feel that is carried over to all aspects of the event: collateral, signage, web and giveaways.

ROCK & RUN

Incorrect Logo Usage

This section demonstrates incorrect uses of the Graniterock logo. The basic rule is not to alter or distort the Graniterock logo in any way.

Be mindful of contrast and backgrounds and always use approved logos.

If it looks wrong, its probably is!

Color

The official colors for the Graniterock logotype are in the Pantone Matching System; PMS 166 (Graniterock Orange) for the angled background square, PMS 624 (light green) for the lighter side of the inset cube, and PMS 5535 (Graniterock Green) for the main Logo. It is very important that all color reproduction exactly match these official corporate colors.

In some cases, the use of three PMS colors for the main logo might be cost prohibitive. The use of a second version of the main logo is acceptable, having a 45% screen of PMS 5535 in place of the inset cube color of PMS 624.

When choosing a background color for the Graniterock logo, clarity should be the objective. The logo stands out best against bright white, which is the preferred background.

GRANITEROCK GREEN CMYK 66/0/57/82 RGB 0/63/44 HEX #003F2C PANTONE 5535 C		GRANITEROCK ORANGE CMYK 0/64/100/0 RGB 244/122/32 HEX #F47A20 PANTONE 166 C
PISTACCIO GREEN CMYK 56/25/45/2 RGB 120/157/144 HEX #789D90 PANTONE 624 C	LIME GREEN CMYK 55/20/100/0 RGB 133/166/63 HEX #85A63F PANTONE 7489 C	GREY CMYK 0/0/0/40 RGB 167/169/172 HEX #0A7A9AC PANTONE COOL GREY 5 C

Typography

Gill Sans

Gill Sans has been chosen for their compatibility with the corporate logotype, readability in various sizes and weights and appearance. Used in a consistent and coordinated manner, they make an important contribution to the Graniterock identity.

Book Antiqua

For a serif option, Book Antiqua is the preferred font style.

Photography

Our photography should be bold and eye-catching. Always be sure headlines, copy and imagery work together. Never use photos that do not relate the marketing material.

Core Value Photography

These photos are reserved for material related to Graniterock's Core Values, refrain from using in general marketing pieces.

Safety Before All Else

Dedication to Customers

Building Great Lives

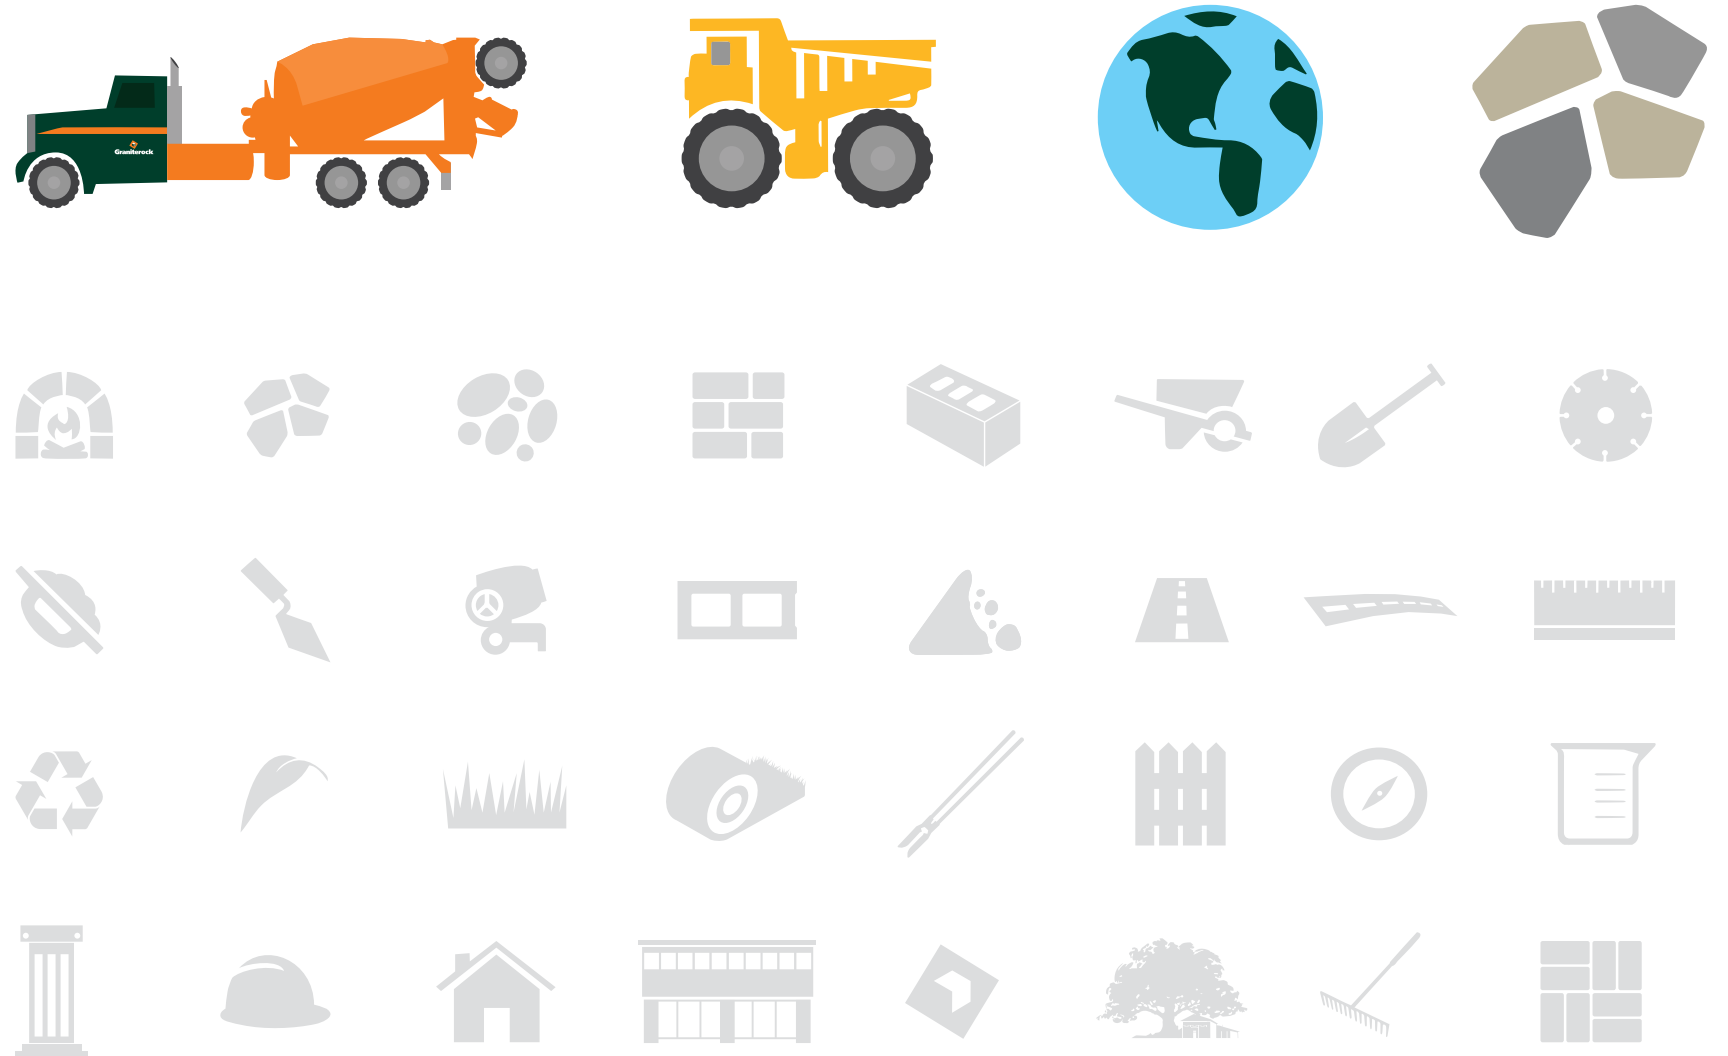

Honesty and Integrity

Make it Better

Iconography

Granitrock icons are an effective way to convey big ideas and/or display products and services without using a single word. Our icons can be colorized or used as silhouette depending on the application.

Video

Graniterock's video productions will incorporate the company's logo prominently and clearly throughout the video, with the Graniterock Video Production logo present at the end. Safety measures and guidelines should be showcased to reflect the company's top priority on safety. Videos should celebrate Graniterock's employees, highlighting their involvement in the community, unique stories, and achievements. Professionalism is essential, with high-quality equipment used for polished and well-edited productions.

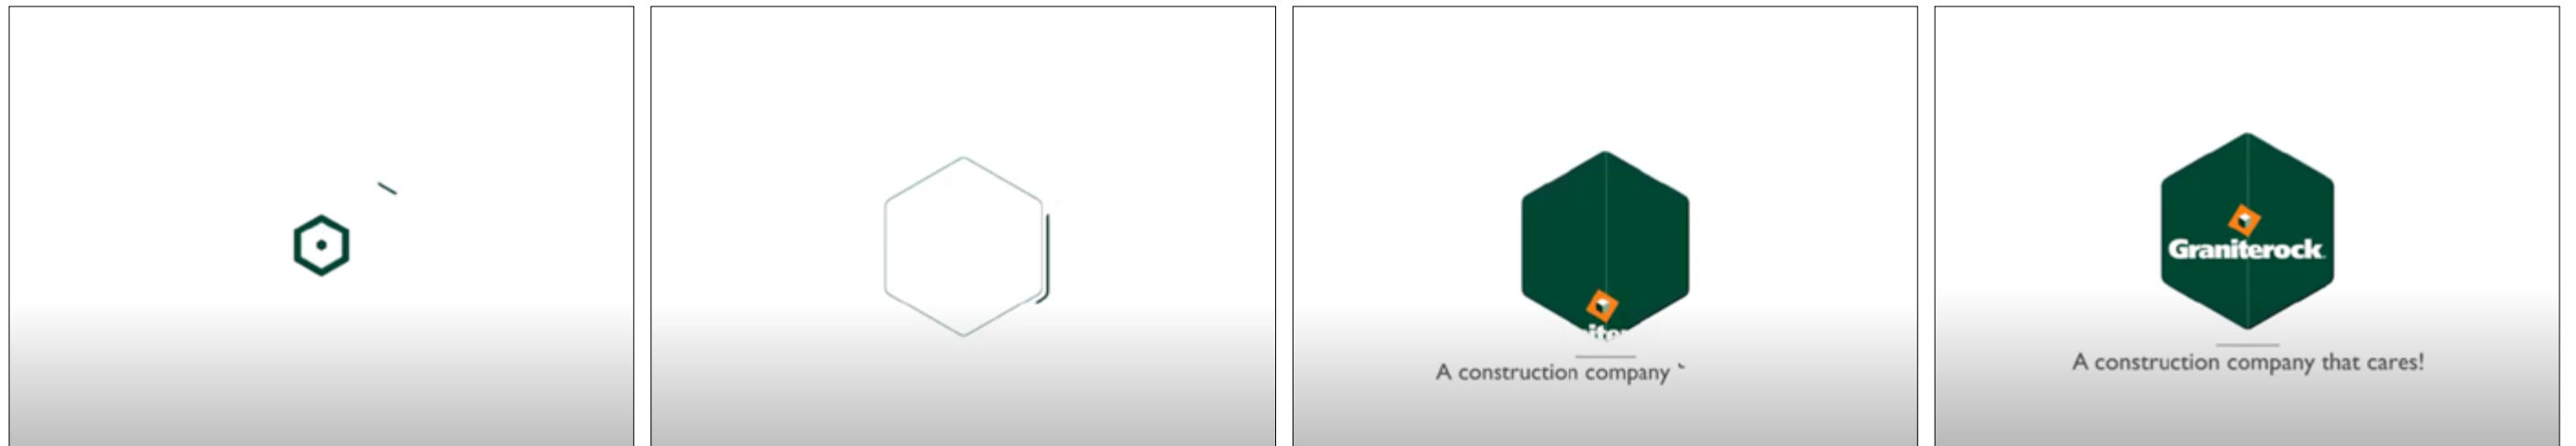

Creativity is also encouraged to showcase the company's products, services, and people in innovative ways. The messaging should accurately convey Graniterock's values, mission, and commitment to excellence, consistent with the overall branding and marketing strategy.

Music and sound effects can enhance the production but should be selected and licensed appropriately. Videos should be concise, engaging, and no longer than five minutes unless there is a specific reason for longer runtimes.

Distribution should be through Graniterock's website, social media, and other relevant channels. Feedback from leadership and stakeholders should be incorporated to ensure high standards.

Logo Animation

Merchandise

The Graniterock logo wear should reflect the quality and professionalism of the company. All items with the Graniterock logo should adhere to the following guidelines:

Logo placement: The logo should be prominently displayed on the item, in a location that is clearly visible and unobstructed. The logo should not be smaller than 1 inch in height or width, and the proportions of the logo should remain consistent.

Logo color: The Graniterock logo should be presented in the authorized colors, which are PMS 166 (Graniterock Orange) PMS 624 (Light Green), PMS 5535 (Graniterock Green), or tone-on-tone is acceptable (see page 8, Color). The logo should not be presented in any other color scheme.

Quality products: Graniterock is committed to providing quality products that represent the brand well. Logo wear items must meet professional standards, be durable, and made of high-quality materials.

Safety first: All logo wear must meet safety standards and not pose any risk to the wearer.

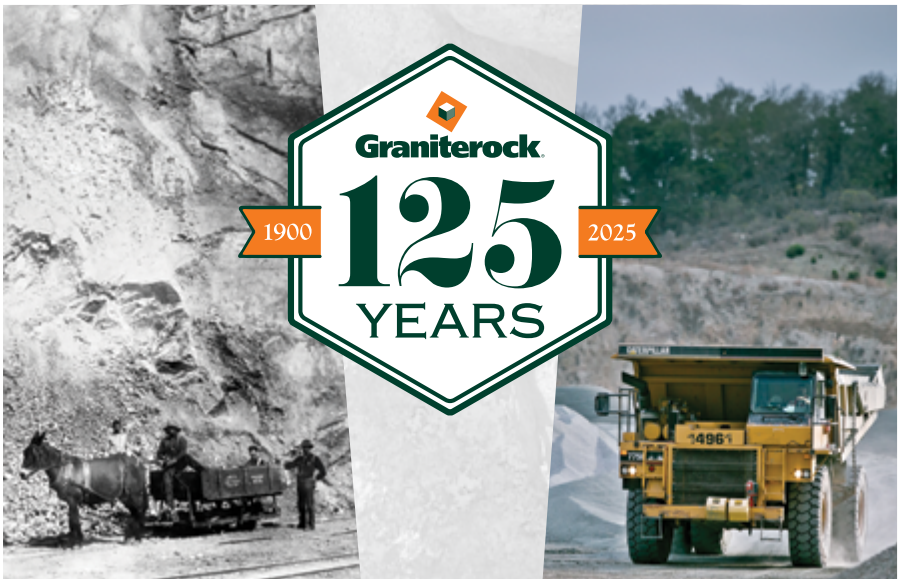

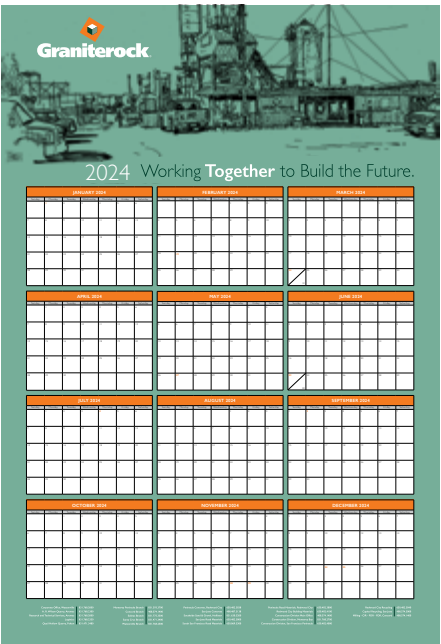

Logo wear selection: Only authorized vendors are approved for producing Graniterock logo wear. The approved vendors will meet the Graniterock brand standards and will provide quality logo wear items.

Consistency: All Graniterock logo wear must meet the same standards and be consistent in design, quality, and style.

By adhering to the Graniterock logo wear guidelines, we ensure that the logo is only displayed on quality, professional items that promote the brand and its values.

Examples of Proper Graphic Usage

QUARRY JOBS

Graniterock's A.R. Wilson Quarry offers an exhilarating, impactful work environment where individual contributions make a difference every day. Each project presents unique challenges and opportunities, set against a backdrop of stunning natural landscapes. With a variety of positions, the Quarry accommodates a diverse range of skill sets and expertise.

Do any of these roles resonate with you?

Engineering and Technical Roles: Design and implement cutting-edge solutions to optimize Quarry operations.

Environmental Management: Ensure sustainable practices and compliance with environmental regulations.

Operations and Logistics: Oversee daily operations and coordinate efficient transport of materials.

Safety Management: Promote and maintain a safe working environment.

Administrative and Support Services: Provide essential support to keep operations running smoothly.
